About Barracuda Networks
Barracuda simplifies IT with cloud-enabled solutions that empower customers to protect their networks, applications, and data, regardless of where they reside. These powerful, easy-to-use and affordable solutions are trusted by more than 150,000 organizations worldwide and are delivered in appliance, virtual appliance, cloud and hybrid deployments. Barracuda’s customer-centric business model focuses on delivering high-value, subscription-based IT solutions that provide end-to-end network and data security.

Core Competencies

Security
Barracuda's powerful, best-of-breed security products secure your organization’s threat vectors—email, web applications, remote access, web browsing, mobile Internet, and network perimeters—whether on-premises or in the cloud.

Data Protection
Easily secure your most important business data, emails, and applications while meeting users’ needs for access across all their devices. The main concerns in this fast-growing category are in regards to compliance and business continuity.

Application Delivery
Enables organizations to provide reliable, fast, and secure access to applications through an integrated product family spanning traffic management, access control, and security for today’s modern and dispersed application deployment architectures.

Differentiators
• Made in the USA
• Single source: one vendor for security, storage, application delivery solutions and support
• Industry’s best customer service; email and phone support offered 24x7 without any phone trees. You will actually speak to a live person.
• Renowned ease-of-use makes Barracuda products and services fast to set up and easy to manage.
• Simple, competitive pricing makes Barracuda products affordable with no extraneous or unexpected costs, and provides low TCO and high ROI
• FIPS 140-2 Consolidated Validation Certificate
• Deployed in both NIPRNet and SIPRNet
