

Barracuda Content Shield

Data Privacy Overview

Overview

This document describes data privacy measures and data storage policies that are specific to the Barracuda Content Shield service (“BCS”).

Barracuda is dedicated to protecting our customers’ privacy and helping them protect the privacy of their users and customers. Our products help customers comply with global, regional, and national privacy regulations, including technical requirements of the General Data Protection Regulation (GDPR).

Barracuda Content Shield provides cloud-based protection against web-based threats. Powered by Barracuda’s extensive threat intelligence network, BCS delivers powerful content filtering and protects users from malicious sites and inappropriate content, helping to keep your businesses safer and employees more productive.

Data Inventory, Data Protection Impact Assessment (DPIA), and Data Mapping

Barracuda has conducted and maintains a data inventory and data mapping of the collection, transfer, and storage of Personal Information for Barracuda Content Shield. Further, the required Data Protection Impact Assessment (DPIA) for applicable controls has been completed and safeguards are in place to mitigate potential risks.

Customer Consent

Barracuda’s Data Processing Addendum sets forth each party’s rights and obligations with regard to the processing of personal data. Barracuda’s Data Processing Addendum for data controllers can be executed on our Trust Center within the Self Service Center at the following address:

<https://www.barracuda.com/company/legal/trust-center>

Cross-Border Data Transfer

Barracuda complies with the EU – US cross-border data transfer mechanisms approved by the European Commission regarding the collection, use, and retention of Personal Information transferred from the European Union to the United States. Any transfer of customer data outside the European Union will be done in compliance with the GDPR and applicable local privacy laws. Barracuda’s Standard Contractual Clauses are located within our DPA at the following address:

<https://www.barracuda.com/company/legal/trust-center>

Employee Training

Upon hire and annually thereafter, Barracuda employees who have access to customer data undergo security and data privacy awareness training to ensure their continued knowledge of obligations and responsibilities to comply with data protection requirements.

Retention and Right to Be Forgotten (RTBF)

At the expiration or termination of your service with Barracuda, Barracuda generally stores customer data for 30 days post termination to allow additional time for you to manually export your data or renew your subscription. After this 30-day retention period, Barracuda will fully disable the account and commence deletion of all customer data at its discretion, including any cached or backup copies.

If you wish to send a Right to Be Forgotten (RTBF) request, please send an email to legal@barracuda.com and Barracuda will provide timely updates through the process of data deletion.

Data Transmission and Storage

Log data is transmitted from the customer endpoints Barracuda Content Shield is enabled on to AWS Elasticsearch via an SSL connection. Data at rest is stored in an AES 256-bit encrypted format.

Access Control

In order to provide customers the flexibility to limit access to their BCS account, IP login restrictions can be set for each user who has access to the Barracuda Cloud Control interface which is used to manage their Content Shield accounts. Those restrictions prevent access to the hosted user interface from an IP address outside the range specified.

Further, customers can configure user roles to manage access privileges to the Barracuda Cloud Control interface manually or by integrating Azure AD. More information about this feature is available at the following address:

<https://campus.barracuda.com/product/ContentShield/doc/79464883/ldap-active-directory-and-barracuda-content-shield/>

Data Location

Barracuda maintains a global network of data centers and annually verifies that each one meets defined security and privacy requirements. The cloud infrastructure for Barracuda Content Shield is deployed in the Americas and EMEA regions via AWS. Any transfer of customer data outside the regions will be done in compliance with the GDPR and applicable local privacy laws.
