

Barracuda WAF-as-a-Service

Cloud-delivered application security protects your customers, ensures compliance, and keeps your business online.

Searching for a Better Way

Retailers are increasingly reliant on web applications and mobile apps to attract customers, manage inventory, and interact with employees and vendors. Managing the specialized web application firewall (WAF) policies for these resources is a full-time job. Barracuda WAF-as-a-Service is easy to deploy and manage, and defends the business from the latest and most sophisticated threats.

Simplified Application Security for Everyone

Remove the complexity of setting up and configuring an appliance or instance. Barracuda WAF-as-a-Service delivers comprehensive protection for your web apps in minutes thanks to its simple five-step wizard, and numerous pre-built templates for commonly used applications.

Complete Control Over Every Component

Barracuda WAF-as-a-Service offers advanced controls traditionally not found in SaaS solutions. Protect websites and apps for customers, employees, and partners with finely tuned specific policies for each application. Building unique per app policies has never been simpler.

By incorporating the enterprise-proven security that Barracuda offers, retailers of all sizes can be more agile by transforming how they manage application security and compliance..

Lower Costs

Accelerate the configuration and maintenance of your security policies saving time and money.

Achieve Agility

Adjust bandwidth to meet dynamic business needs without disruption or costly investments.

Rich Analytics

Simplify how you build compliance reports with pre-built templates and intuitive audit logs and reports.

Built for Automation

Fully-featured REST API enables near-limitless integration options for devops teams.

“Calling Barracuda’s WAF a firewall is seriously selling it short.”
